Title

EQUIPMENT- CLASS RULES CHANGE – Class rule c.9.1 j

Subtitle

Replacement of rivets

A submission from

GBR

Purpose or Objective

To bring inline class rule with what is common practice in the class, also we currently don't have any rivets in the IQ boom

Proposal

C.9.1 RIG
MODIFICATIONS

~~(j) Rivets may be replaced without approval with screws or bolts with optional nuts but shall be fitted into the original inserts that shall not be modified~~

(j) Screws on the back end of the boom may be replaced with different screws or bolts with optional washers or nuts but shall be fitted into the original inserts that shall not be modified. These may also be glued or taped to keep secure.

Current Position

C.9.1 RIG
MODIFICATIONS

(j) Rivets may be replaced without approval with screws or bolts with optional nuts but shall be fitted into the original inserts that shall not be modified

Reason

The boom does not currently have any Rivets that can be replaced

The above is best practice as often the screws drop out and would be seen as good maintenance.
