Title:

Race Management

Subtitle:

Size of Fleet in World Championships

A submission from:

The French Sailing Federation (FRA)

Purpose or Objective

- Helping the Race Management to provide quality racing in World Championships
- Delivering a premium event on and off the water
- Helping the balance of racing between under and overpower races

Proposal

Maximum fleet size should be 80 participants for Women and 80 for Men in Senior World Championships

Current Position**Reason**

After 3 years of racing we have now a feedback of the overall needs to get quality racing at international level. The fleet sizes give a lot of problems to race properly especially in light wind, so high % of numbers of races made are done in stronger wind including overpower reaching in trapezoid course.

One of the purposes of this submission is to go further by decreasing the size of the fleet and heats to help with race management in light wind. This should achieve the goal of a wider panel of body weight to perform at international level

80 athletes men and 80 athletes women means 160 international athletes in the World Championships that will race in a quality event that should be the pinnacle event of the iQFOiL season
